

ENVIRONMENTAL POLICY

Sanaway is a leading washroom and matting company supplying services to a wide range of differing business types. Our principal services include the installation and maintenance of sanitary bins, automated air fresheners, sanitizers and washroom equipment. In addition, we also supply matting and interior planting services.

Aims of this policy

We recognise that our operations influence the local, regional and global environment. Because of this, we attach maximum importance to matters concerning the environment. Our policy is to meet and, where practical, exceed all relevant regulatory requirements and to minimise any adverse environmental effects caused because of our activities.

- We will continually assess the environmental impact of our operations and, through minimising the use of materials and resources; we will reduce our wastage to the lowest practical level.
- We will minimise waste, especially hazardous waste, and wherever possible recycle materials. We will dispose of all waste through safe and responsible methods. Consideration will always be given to the environmental effects of our raw materials sourcing and wherever possible we will use materials and components that can be recycled.
- Pressurised fragrance aerosols used in our automated air freshener units do not contain CFC gases. We use all biodegradable chemicals in our services.
- We will work with our suppliers to ensure they recognise and reduce the environmental impact of their products and transportation. We will also assist customers to use our products and services in an environmentally sensitive way.
- Through co-ordinating route planning and delivery schedules we will seek to realise the dual benefits of reduced fuel consumption and lower exhaust emissions.
- Through strategic planning we will minimise the environmental effect of new developments and aim to include environmental considerations in investment and business decisions.

Our Commitment

Employee involvement in environmental matters is encouraged at all levels and will be promoted through training, communications and a constant reappraisal of working methods and techniques. The Directors are committed to the implementation of this policy and will give full backing to all those authorised to carry it out.

Director:

Patrick Martin
